

Question Starter Card - September 7th or adapt for a nearby date.

Daily Depositor - September 7th

**Gr. 4 EDC '05
SEPTEMBER**

If we collect \$1 for the September 1st, \$2 for September 2nd, \$3 for September 3rd, and so on up to September 7th, how much money will we have?

How did you add? What are some quick ways to add $1+2+3+4+5+6+7$?

When we write 28, what is the value of the *digit* 2? The *digit* 8?

How much more money do we need to get to \$50? How did you get your answer?

On what day of September will we reach \$50 or more? (Sept. 10) Check with the person beside you to see if you both agree. What did you all get for an answer, class? Would someone who got September 10th, be willing to share how you got that answer?

Perhaps by tomorrow you can all figure out the exact date when we will place our first 100-dollar bill into the Depositor.

How much money do you think we'll have by the end of the month? How did you get your *estimate*?
