

Graph – Beginning of the Month

**Grade K
OCTOBER
or Month 2**

What were our three choices of fruits?

Let's put up one handful of our markers onto our graph. What do you notice?

Which fruit has the *most* markers so far?

Which fruit has the *fewest* markers so far? Is there a "tie"?

How many votes for bananas so far? For apples? For oranges?

How many *more* children chose ___ than chose than _____ so far? How did you figure this out? How can we use the markers on the graph to prove this?.

How many of our votes are on the Graph so far? Do you think _____ will still have the most when we put up another handful? We'll have to wait to find out.
