

Clock – Day of School 21 (Adapt to any nearby day)

**Grade 1
OCTOBER**

What minute mark is our long minute hand pointing to today?

Let's use the long five-minute marks to count by fives and clap on the last five-minute mark. How many groups of five did we count?

How many minutes have we moved ahead since minute 20? Minute 15?

How many more minute spaces until minute 25?

How can we show today's number of minutes on the Clock with tally marks?
What do you notice about our tally?
