

Graph – Beginning of the Month

Grade 3
October

What do you notice when you look at the sample of weather data that we have collected so far this month?

For how many days have we collected data so far? Can you find the total without counting the spaces one at a time? How did you get the total?

For our sample of October weather so far, what type of weather has occurred *most often*?

For our weather sample, *how many more* days have been ____ than ____? How could you figure out this difference?

How many fewer ____ than ____ days?
