

Question Starter Card

Birthday Graph – Beginning of the Month

Grade 1
NOVEMBER
or Month 3

Where is November in our line up of months? (Almost at the end; toward the end; next to last; month number 11; and so on.)

Are there *more* birthday tags on the November package or on the _____ package? Are there *fewer* tags on November or on _____? Are there any months with the *same* number of birthdays?

If we look at the tags on the November package, can we figure out who will be the *first* person to have a birthday in November? How did you decide?

If we give the tags to our Birthday people, how would you have them stand and line up in order, so the first birthday is at the front of the line and the last birthday is at the end?

If _____, who has the first birthday, puts his (or her) tag on the Calendar to mark his (or her) birthday, how can this help _____ find the correct space to put her (or his) tag on Calendar.

How many days from today until the next birthday?
