

Calendar – Beginning of the Month

**Grade 1
NOVEMBER**

Can you say each number as we take down our October pieces? (1, 2, ...31)

What month are we taking down and saying goodbye to? (October)

Let's put October back into our line-up of Birthday Packages. Can we name all our Birthday Packages up to our new month, and clap on November. (January, February, March...November (clap)

The last day in October was what day of the week? So what day of the week is the first day in November?

We've put our November Birthday Package by the Calendar. Who will have the first birthday this month? Where should the first birthday tag marker go on the Calendar? Where should the next Birthday tag marker go? How did you figure that out?

What shape (or figure) do we see today? What makes a triangle a triangle? What makes a square a square?
