

## **Daily Depositor – Beginning of the Month**

**Grade 1  
NOVEMBER  
or Month 3**

---

How many rocks are in our Depositor today? How do we write this number?

---

If we take \_\_\_\_ rock(s) out of the pocket, how many will there be?

---

If we add \_\_\_\_ rock(s) to our pocket, how many will there be?

---

How many more rocks do we need to get our next group of ten?

---

I've spilled all the rocks on the rug for you to look at. What do you notice about these rocks? (Some are big; Some are polished; Different colors; and so on.)

---

Let's sort them by (polished) and (**not** polished). Which group has more? If we line them up 1 to 1, across from one another, how many more \_\_\_\_ than \_\_\_\_ do you see? Who would like to suggest another way to sort our counters?

---

---
