

## **Graph – End of the Month**

**Grade 1  
OCTOBER  
or Month 2**

---

What do you notice when you look at our Weather Graph at the end of our month?

---

What does our graph tell us about our fall weather where we live?

---

What kind of weather did we have the *most*? For how many days?

---

How many *more* \_\_\_\_ days than \_\_\_\_ days are on our graph? Can someone show us how to figure this out?

---

How many *fewer* cloudy days than rainy days are on our graph? Can someone show us how to *compare* the cloudy and rainy days on the graph?

---

On how many days did we record the weather in October? How did you find the total number?

---
