

Totally Ten – End of the Month

**Grade 1
OCTOBER
or Month 2**

If we add one more dot today how many dots will we have? (38) How many days have we come to school? (38)

How many groups of ten? (3) How many extra ones? (8)

How do we write 38? (**3** groups of ten and **8** extra ones.) How do we read this number? (38)

If we add a group of ten, how many dots will we have? (48) How can we prove it?

If we take a group of ten away, how many dots will we have? (28) How can we prove it?

We have 8 dots in the ten grid on the white side today. How can you know there are 8 without having to count all the dots? Convince us.

If we take away the blue dots, how many will be left? What if we take away the red dots?
