

Temp. Graph – Beginning of November

**Grade K
NOVEMBER
or Month 3**

This month we're going to keep track of how warm or how cold it is outside by choosing a clothing marker to stand for hot, warm, cool, cold, and very cold weather. Which types of clothing do you think we will be wearing outside this month? So how many different rows of markers will we need on our graph?

What would be the best choice of clothing to wear outside today at recess? If we don't all agree, we will take a vote.

How many days have we marked the temperature so far? How many of the days were _____?

How many more _____ days have we had than _____ days?

How many fewer _____ days have we had than _____ days?
