

## Question Starter Card

### Calendar – End of the Month

Grade K  
OCTOBER  
or Month 2

---

What patterns do you see?

---

If we say the pattern, can you tell what comes next? (Red, red, red, orange, red, red, red, orange, red \_\_\_\_.)

---

Let's say the numbers we see and clap on every red number. Now let's clap only on every orange number.

---

Now let's whisper the numbers on the red leaves and say the numbers on the orange leaves loud.

---

What motion can we act out for each red leaf? (Hop, for example.) What motion can we do for every orange leaf? (Touch our toes, for example.) Let's begin.

---

Let's put three red leaf calendar pieces and one orange leaf piece into a bag. If we take turns drawing out a calendar piece, putting it back and shaking the bag each time, which color do you think we will see come out more times? Which color is less likely to come out?

---

When we look at our Calendar, do we have *more* or *fewer* orange leaves than red leaves?

---
