

## **Graph – End of the Month**

**Grade K  
OCTOBER  
or Month 2**

---

What do we know now that everyone's choice is on our graph?

---

Which fruit got the most "votes"? How many of us chose this fruit?

---

How many more children chose \_\_\_ than chose \_\_\_?

---

How many fewer children chose \_\_\_ than chose \_\_\_?

---

How many children voted?

---

Which fruit was ahead when we put up our first votes? Did this fruit end up with the most votes? Is it always smart to make a guess about what we *all* think by looking at only how a few of us are thinking?

---

---
