

## **Calendar – Middle of the Month**

**Grade K  
OCTOBER  
or Month 2**

---

What is the name for today's day of the week? What is the date today?

---

What do you notice about the Calendar pieces so far? What patterns do we see? Would someone like to share a motion for us to use for each red leaf in the pattern? A motion to use for each yellow leaf? Let's act out the pattern.

---

What will the color be tomorrow? What makes you think this?

---

What number will be on tomorrow's piece?

---

How many birthday markers are still on our Calendar? How many markers are back in the basket? How many in all?

---

Is our next birthday marker a picture of a cylinder or a box shape? How can you tell?

---

Can you point to something in our classroom that is an example of a box shape? Can you point to an example of a cylinder?

---
