

Daily Depositor – Middle of the Month

Grade K
OCTOBER
or Month 2

How many rocks are in our Depositor today?

How many groups of ten do you see on the blue side of our mat? How many extra ones on the white side of our mat?

How do we write today's number? Which do we write first, the groups of ten or the number of extra ones?

If we take out ___ rocks how many will we have?

Can someone tell us a *take away* story to act out with our rocks?

I've spilled out our rocks on the rug and *sorted* them into two piles. Can you guess why all of the rocks in this pile belong together? How are they all *alike*? How are they *different* from the rocks in the other pile?
