

Number Builder – Mid Month – Sums for 8

**Grade 1
DECEMBER
or Month 4**

Who can tell us one addition fact for 8? Does someone else have another way to suggest to make 8? Let's see if we can make a list of all the combinations for 8.

To play Make a Match we have 12 cards turned facedown to make 3 rows of 4. The goal is to keep finding 2 cards that make a sum of 8.

What card shall we turn over? First, tell us if it is in the top, bottom, or middle row, and then, if it is under the first, second, third, or last clip.

We've turned over _____. What number do we need to find to make 8?

Does anyone remember where we can find this number ____? Tell us the row and which clip?
