

Question Starter Card – December 6th or any nearby date.

Daily Depositor – Beginning of the Month

**Grade K
DECEMBER
or Month 4**

How many days have we colored in so far? How do you know for sure? Does someone else have a different way to check today's number?

How many *inch squares* have been colored in blue? How many have been colored in red? How many in all?

If we color *one more* unit, how many will we have colored in?

Can we find something in the room that is the *same length* as the inch squares that are colored in on our strip hanging on the white side?

How many *units* do we still have left to color on our first strip of ten?

On the 10th, we have a full strip of ten colored in. We will move it over to the blue side of our mat and record 1 for "*1 full strip of ten*" and then record 0 for "*no extra units*" below the new empty strip on the white side.
