## Daily Depositor – Middle of the Month

**Grade K  
DECEMBER  
or Month 4**

---

How many spaces have we colored in so far? How do you know? Is there another way we can check the total?

---

How many groups of 5 do we have so far? How many extra blue spaces?

---

What does the digit 1 stand for? (One full ten-strip) What about the digit 4? (Four extra blue spaces)

---

How many spaces are left to color in to get to 20?

---

If we take the full 10-strip off the mat and use it to measure the length of a pencil, about how many spaces long do you think the pencil will be? Let's match up the end of the pencil to the end of the strip and find out? What about the length of a \_\_\_\_\_? If each space is an inch, how many inches long is the \_\_\_\_?
